

FOUED MELKI

SENIOR FULLSTACK WEB DEVELOPER

Offenbach am Main, Germany • +49 015205456817 • fouedmelki@gmail.com

PROFESSIONAL SUMMARY

Senior Fullstack Developer with 10 years of experience building and delivering web applications end-to-end. Proficient across the entire development lifecycle: from translating business requirements into technical solutions to deployment and testing. Experienced in leading technical decisions, onboarding team members, and collaborating closely with stakeholders. Comfortable wearing multiple hats including Scrum Master and Product Owner responsibilities. Strong background in Node.js, React, TypeScript, and MongoDB, with hands-on experience in DevOps practices and CI/CD pipelines.

SKILLS

Languages: JavaScript/TypeScript, Java, Solidity, Rust

Frontend: React, React Native, Tailwind, D3.js

Fullstack Frameworks: Next.js, Remix

Backend: Node.js, Express.js, FeathersJS, NestJS, Loopback.io, GraphQL

Databases & Storage: MongoDB, PostgreSQL, Redis, Elasticsearch

ORM / ODM: Mongoose, Prisma

Testing: Cypress, Playwright, Selenium, Cucumber, Jest, Vitest, Mocha, React Testing Library

DevOps: Docker, Git/GitLab, Azure DevOps, Jenkins, CI/CD Pipelines

Tools: Jira, YouTrack, Azure Boards, Figma

Methodology: Agile Scrum

EXPERIENCE

Sensory-minds, Offenbach am Main

Senior Fullstack Web Developer | October 2023 - Present

Fullstack Web Developer | October 2022 - October 2023

Building and maintaining a B2B portal and admin panel for managing business operations in the tobacco distribution industry within a 10-person team. Contributing to technical decision-making, architecture, and team mentoring.

- Translating business requirements into scalable technical solutions in close collaboration with stakeholders.
- Contributing to solution design during grooming sessions and sprint planning.
- Designing and implementing APIs and background jobs to automate business workflows and ensure reliable data processing.
- Collaborating with designers to build a responsive frontend aligned with the design vision.
- Onboarding new team members by guiding them through system architecture, local setup, and codebase structure.
- Conducting code reviews and providing recommendations for optimization, refactoring, and maintainability.
- Pair programming on complex tasks to improve code quality and share knowledge across the team.
- Daily maintenance, bug fixing, and continuous delivery of new features.

Core Tools: Node.js, TypeScript, React, MongoDB, Redis

Total Energies, Paris

Fullstack Web Developer | November 2020 - October 2022

Developed a product management portal and a showcase website for lubricant products across multiple affiliates, within a 5-person team.

- Building an API integrating 8 different data sources including external APIs, CMS, ERP, databases, and Redis.
- Developing a highly optimized responsive frontend in continuous collaboration with the UI/UX design team.
- Collaborating on technical solutions during grooming sessions.
- Writing unit and integration tests to ensure code reliability.
- Pair programming on complex features to maintain code quality.

- Daily maintenance, debugging, and delivery of new features.
- Managing CI/CD pipelines and deployment workflows using Azure DevOps to ensure reliable and automated releases.
- Facilitating daily standups, sprint planning, and retrospectives as Scrum Master.
- Tracking sprint progress, removing blockers, and ensuring the team stayed aligned with sprint goals.

Core Tools: React, TypeScript, Next.js, GraphQL, Directus, Redis, PostgreSQL, Remix, Cypress, Jest, Vitest, Azure DevOps

RATP Group, Paris

Fullstack Web Developer | May 2019 - November 2020

Developed an application for managing construction sites across the METRO, RER, and TRAMWAY rail networks, within a 20-person team.

- Developing responsive dashboards with complex data visualizations using D3.js.
- Building backend services using Java 8 (Play Framework) including APIs, document generation (PDF, CSV, DOCX, XLSX), and automated email reminders.
- Writing unit and integration tests to ensure code reliability.
- Configuring and maintaining CI/CD pipelines using Jenkins for automated builds, testing, and deployments.

Core Tools: React, Java 8, D3.js, PostgreSQL, Jest, Jenkins

Xtech, Tunis

Fullstack Web Developer | October 2018 - April 2019

Developed a scalable event management application and a financial dashboard module for a major music industry company.

- Optimizing data fetching algorithms across 5 data sources, reducing processing time from 90 minutes to 8 minutes.
- Implementing APIs using FeathersJS.
- Building responsive dashboards with optimized rendering and improved data flow performance.
- Writing unit tests to ensure code reliability.

Core Tools: React, Redux, TypeScript, Node.js, FeathersJS, MongoDB, Jest, Mocha

LPP Digital, Brasilia

Fullstack Web Developer | January 2018 - October 2018

Developed a school management system featuring smart tools including an exam generator, auto-corrector, schedule generator, and student notebook generator, within a 5-person team.

- Full ownership of the frontend: proposing, developing, and testing solutions.
- Contributing to API development.
- Facilitating Scrum ceremonies including daily standups, sprint planning, and retrospectives.
- Reporting progress and presenting deliverables to stakeholders.

Core Tools: React, Node.js, MongoDB, D3.js, Jest, Mocha

EGOE Developer, Tunis

Fullstack Web Developer | June 2016 - January 2018

Developed multiple web and mobile applications across various business domains within a 5-person team, including a web media player, an advertising mobile app, a competitor monitoring tool, and an interactive family tree visualizer.

- Migrating legacy applications to Angular.
- Developing a mobile application using React Native and Redux.
- Designing data models and building web scrapers using PhantomJS.
- Building dashboards with interactive lists and charts.
- Developing a custom interactive family tree visualization using D3.js.

Core Tools: React, React Native, PhantomJS, Node.js, Express.js, MongoDB, D3.js

INTERNSHIPS

EGOE Developer, Tunis

Intern | January 2016 - June 2016

Developed a human resources management web application.

Core Tools: React, Node.js, Loopback.io, MongoDB

Rosafi Holding, Tunis

Intern | July 2015 - August 2015

Built a customer service application connecting end clients, support, and technical teams.

Core Tools: Angular, Node.js, Express.js, MongoDB

FREELANCE PROJECTS

Nutritional Ingredient Analyzer

Freelance Project, API |

Developed a REST API that retrieves product ingredient data based on EAN codes using Open Food Facts, evaluates nutritional scores, and flags ingredients based on religious dietary restrictions.

Core Tools: Rust

Leaves & Payroll Management System

Freelance Project, Fullstack |

Developed a fullstack application for managing employee leaves and payroll processing.

Core Tools: Next.js, NestJS, Prisma, PostgreSQL, Redis, Docker

Additional freelance projects available upon request.

EDUCATION

Higher Institute of Computer Science, Tunis — *Master's Degree*

September 2016 - October 2018 | Software and Web Development

Higher Institute of Computer Science, Tunis — *Bachelor's Degree*

September 2013 - June 2016 | Computer Science
